

TDI Advanced Nitrox

Course Overview

The purpose of the course is to examine the use of EAN-21 through one hundred (100) percent oxygen for optimal mixes to a depth of 40m. The objective of this course is to train divers in the benefits, hazards and proper procedures for utilizing EAN-21 through one hundred (100) percent oxygen for dives not requiring staged decompression. Decompression techniques may be combined with this course at the discretion of the instructor.

Prerequisites

To enrol in the course, you must be a minimum age of fifteen (15), be certified as a TDI Nitrox Diver (or equivalent) and show proof of 25 logged open water dives.

What's Involved

This course has three components: Knowledge development, confined water skills development and open water dives. These will be scheduled to suit divers enrolled in each course. In total 4 dives are required with a minimum accumulated bottom time of 100 minutes.

What's Included

The course fee covers instructional time and certification costs only. Students are expected to pay any boat costs and all gas fills required to complete the course. Shore dives can be used to minimise these costs.

Why Do This Course?

The Advanced Nitrox course will appeal to divers looking to extend their theoretical diving knowledge, particularly with relation to richer nitrox mixes and dive planning. The course provides exposure to technical diving equipment and skills and will provide a foundation on which to base any future diving aspirations.

What You Need

In addition to standard scuba equipment, students are required to have a spare mask, a delayed surface marker buoy, a spool/reel with 30m of line. We recommend that this course is combined with Decompression Procedures and is undertaken using manifolded twin cylinders. These may be rented for the duration of the course.

What It Costs

As with all our courses, the cost varies with the number of students enrolled. Whilst we endeavour to fill a course, we cannot guarantee to do so in all cases. Therefore we strongly suggest group bookings when possible.

No. of Students	2	3	4
Course Cost	\$1400 (\$700 each)	\$1800 (\$600 each)	\$2000 (\$500 each)
