

PADI Wreck Diver

“Learn the basics of wreck diving”

Course Overview

Ship wrecks have always drawn divers; the curious, the adventurous and the treasure seekers. Have you ever wondered what lies beyond those shadowy doorways and darkened portholes? Is it time you began to explore the incredible history waiting beneath the waves?

The PADI Wreck Diver course is designed to introduce recreational divers to the techniques and procedures required to undertake limited penetration dives. This course teaches you how to identify hazards, lay lines and safely conduct dives into the overhead environment. You will also be introduced to basic mapping and navigation techniques, all aimed to enhance your future wreck diving experiences.

NZ Wreck Dives

New Zealand has a rich maritime history and there are many splendid wrecks to be visited. Enjoy the beauty and turbulent recent history of the Rainbow Warrior, investigate the purposely sunk wrecks Waikato and Canterbury, or dive into the conspiracies surrounding the sinking of the mighty Mikhail Lermontov.

Your Instructors

All of the Tech Dive NZ Instructors are passionate wreck divers and we have been exploring ship wrecks for over 20 years. Our adventures have taken us from Scapa Flow in the far north of Europe, to isolated islands in the Pacific such as Chuuk Lagoon, Vanuatu and the Solomons. We have dived submarines in the English channel, cargo ships in Indonesia, transport ships in the Red Sea and aeroplanes in Hawaii. With our extensive and varied experience we can offer you an outstanding introduction to wreck diving.
